# Research and Innovation

Cutting-edge centers and resources offering groundbreaking technologies to advance the innovation and research ecosystem at AUM.

As we prepare our students of today to become the leaders of tomorrow, a core element of our educational philosophy is to apply “learning by creating” throughout their educational journey at AUM. In light of this, AUM’s innovation centers, labs, and cutting edge facilities are in place, offering groundbreaking technologies and resources that are designed to equip our students, through experiential learning, with in-demand skills required by top industries.

# Research Council

The AUM Research Council is a joint task force from the College of Engineering and Technology, College of Business Administration and LAD department.
