

Academic Advancement Center

The Academic Advancement Center – AAC – is a centralized unit where Business and Engineering students meet experienced advisors who guide them to plan and achieve their degree requirements to graduate on time and to overcome any academic obstacle they may face during their academic journey. Each student will have a meeting with her/his advisor before online

registration every semester about courses, majors, and job options.

Your advisor will be always available to:

- Assist you in selecting courses and planning for a smooth graduation.
- Support you in setting your academic goals and enhancing your performance.
- Help you in understanding and implementing AUM policies and regulations
- Provide subject-related guidance and study-career consulting

For more information please set an appointment with your [advisor](#).
