

Campus Accessibility

The AUM campus was designed in a way that facilitates the accessibility of any person with reduced mobility or special needs to all buildings and facilities on campus. This goes in line with our continuous efforts to provide an equal learning opportunity and full participation in the life of the college for all current and prospective students.

Support and Services include:

- Designated parking spaces and a specific entrance gate are available for people with special needs
- All bathrooms have a toilet room accessible for people with special needs
- The classroom doors are 1.2 meters wide to allow easy access
- Ramps are installed for all building entrances and across the landscape to allow ease of access
